TRUSTED SECURITY

**Secure foundation
for YOUR growth**

2020

WHO WE ARE

Infocom was founded in 1991 as a 50/50 joint venture of the Ukrainian government PTT agency and German IT-company Controlware GmbH and started its operations in the same year.

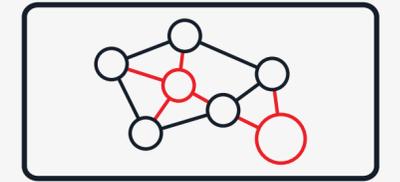

1991

As the first-ever Ukrainian commercial telecom carrier, Infocom is an essential part of the history of innovations and development of the Ukrainian IT infrastructure.

By providing first internet access in Ukraine, adopting new technologies of that time Infocom soon became the most experienced, qualified, and respected telecom company which led to the first partnership with international operators such as Sprint, Datex-P, Global One, and Deutsche Telecom.

Today Infocom is 100% member of the Controlware Holding and provides services to international and state organizations, energy and financial sectors, ensuring work of governmental critical infrastructure, providing B2B and B2C services.

WHAT WE DO

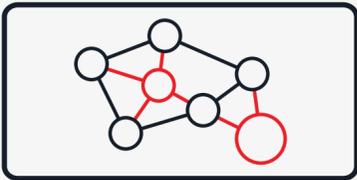

Infocom is the most experienced Ukrainian company whose highly redundant infrastructure today provides international telecom products as a wholesaler outstanding customer-oriented services nation-wide.

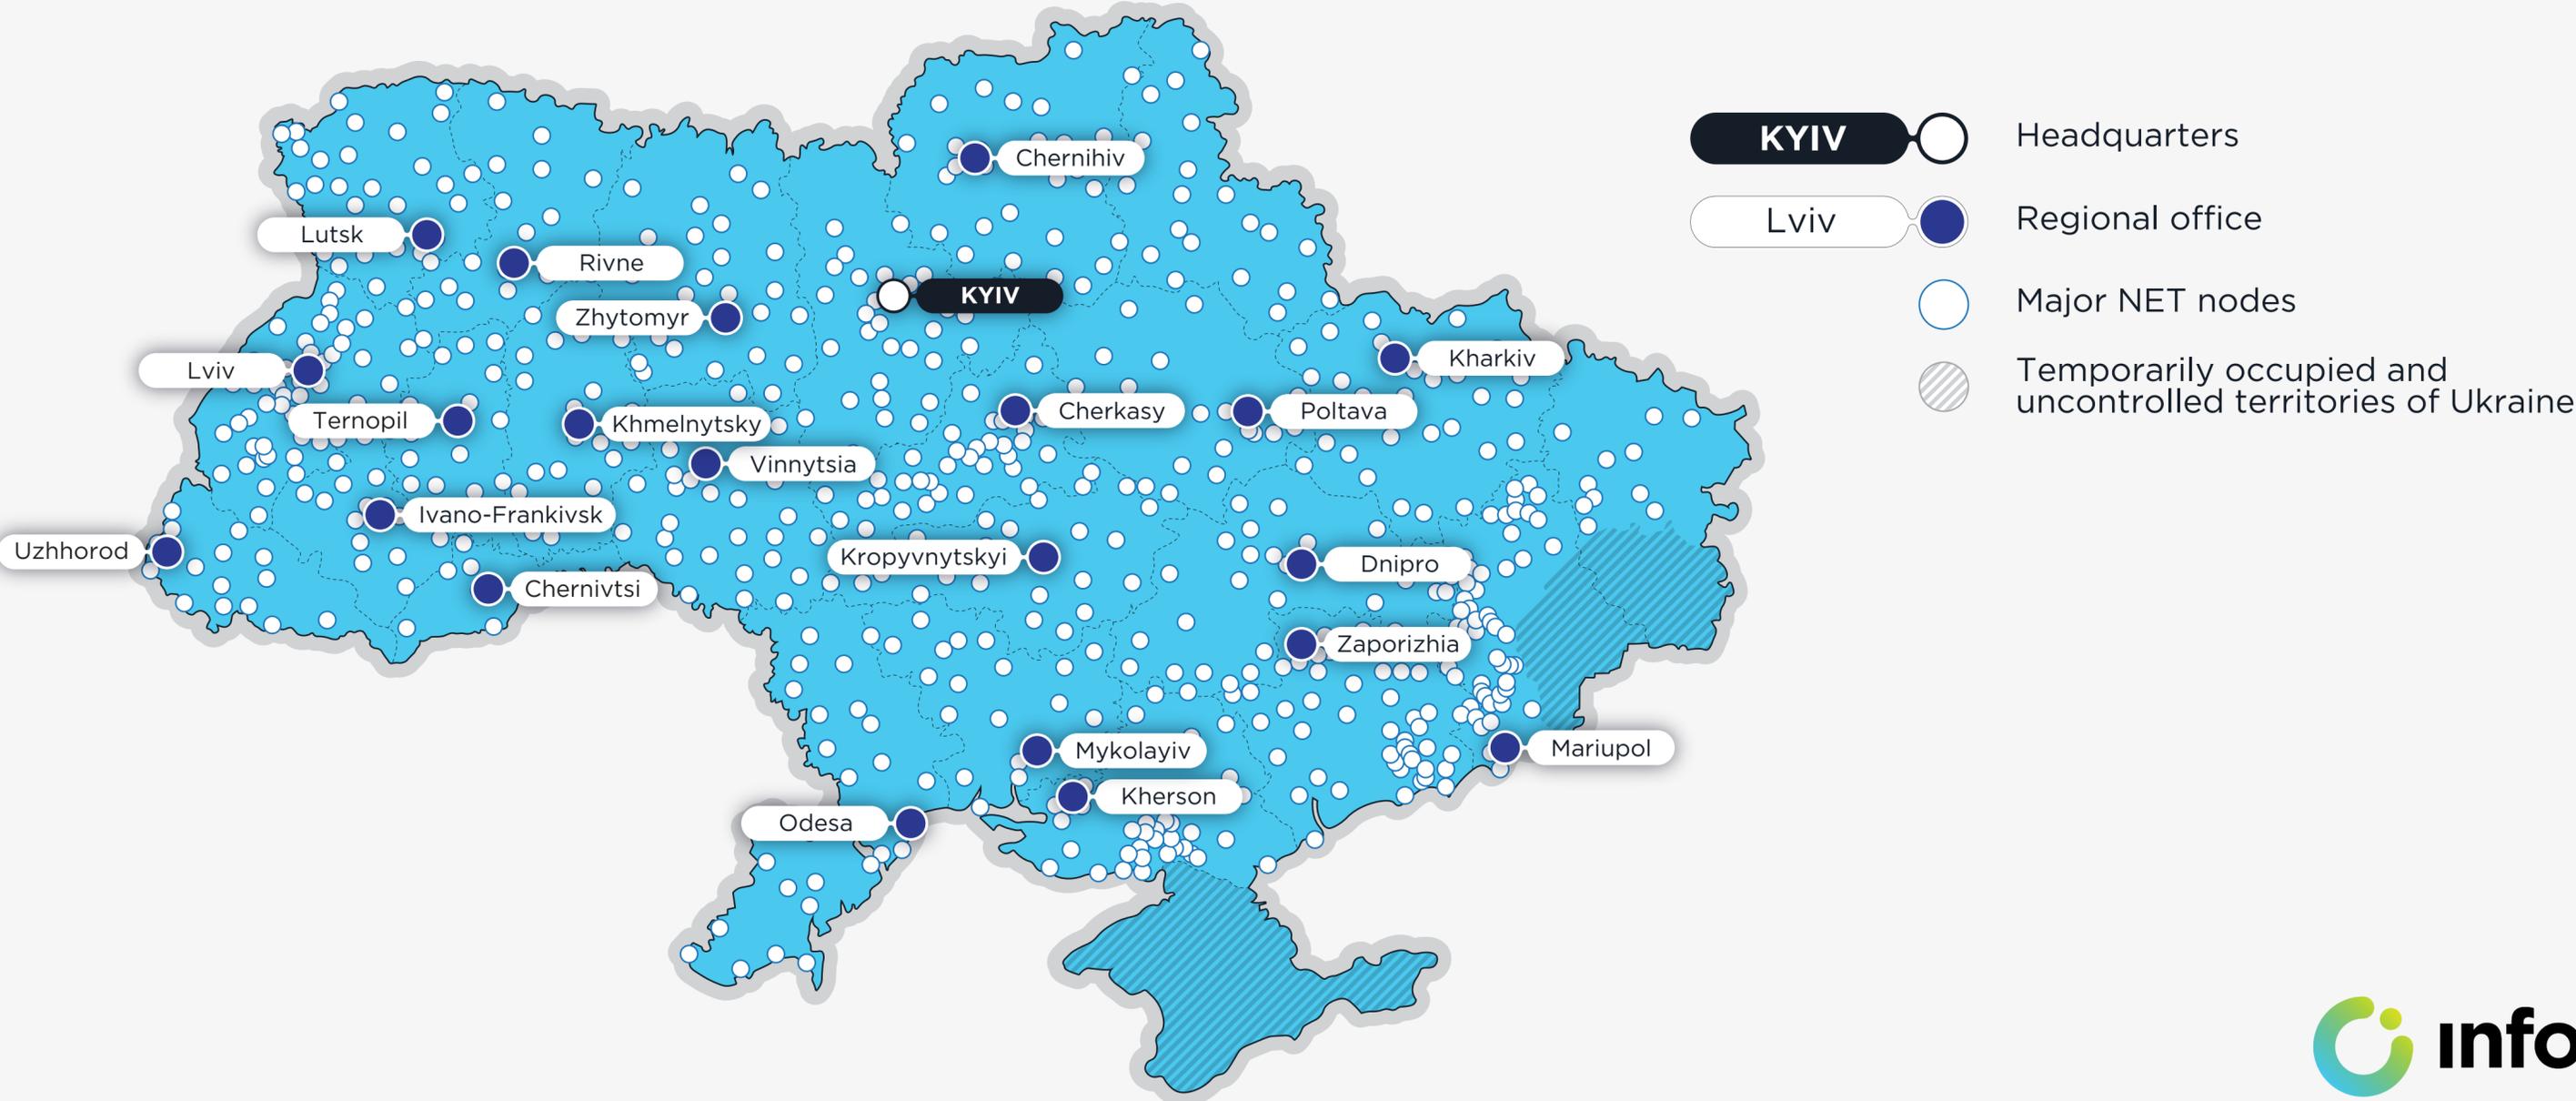

As the most experienced Ukrainian company with high redundancy infrastructure Infocom provides very reliable services and high-level comfort by giving a single point of contact to our clients, English speaking 24/7 NOC, and operating according to international SLA standards including timely work notifications.

Deep-reaching topology with more than 1000 nodes in operation all over Ukraine, short «project-based» last mile within a locality, RF license for long-range WiFi and WiMAX network with 500+ running BTS allow to respond fast to any possible inquiry providing Fast Start service deployment in almost any location. This is possible due to 22 regional offices (operating since 90's) each with a team of professional engineers, a wide range of hardware, and SPTA sets.

WHAT WE DO

The geographical location of regional offices allows us to achieve onsite intervention time less than 2 hours thus significantly speeding up the deployment process and maintenance.

Despite the existing comprehensive wide range of available services, we do not standstill. Infocom is continuously adopting innovative technologies and offering the market new leading-edge services. In 2019 Infocom became MSSP and offers managed security services to all its customers

2020
